Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The present invention is directed towards an information processing apparatus connected to a network with other information processing apparatuses. Each independent claim identifies the uniquely distinct feature of second display control means for controlling a display of a second control screen based upon second control screen data, output means for outputting and receiving first command signals when said selected information processing apparatus is selected from among said other information processing apparatuses via said first control screen, and for outputting and receiving second command signals corresponding to input to said selected information processing apparatus when predetermined instructions are input by a user via said second control screen. The closest prior art, Croy et al. (6040829) discloses an information processing apparatus connected to other information processing apparatuses via a network, either singly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
